Housing Installation

1. Select an area to insert cage nuts into the Cabinet.

Installation area for Housing 1

Cage nuts slots

ⓘ = *To determine the installation area of the housing & cagenuts, use the visual reference shown on the cabinet.*
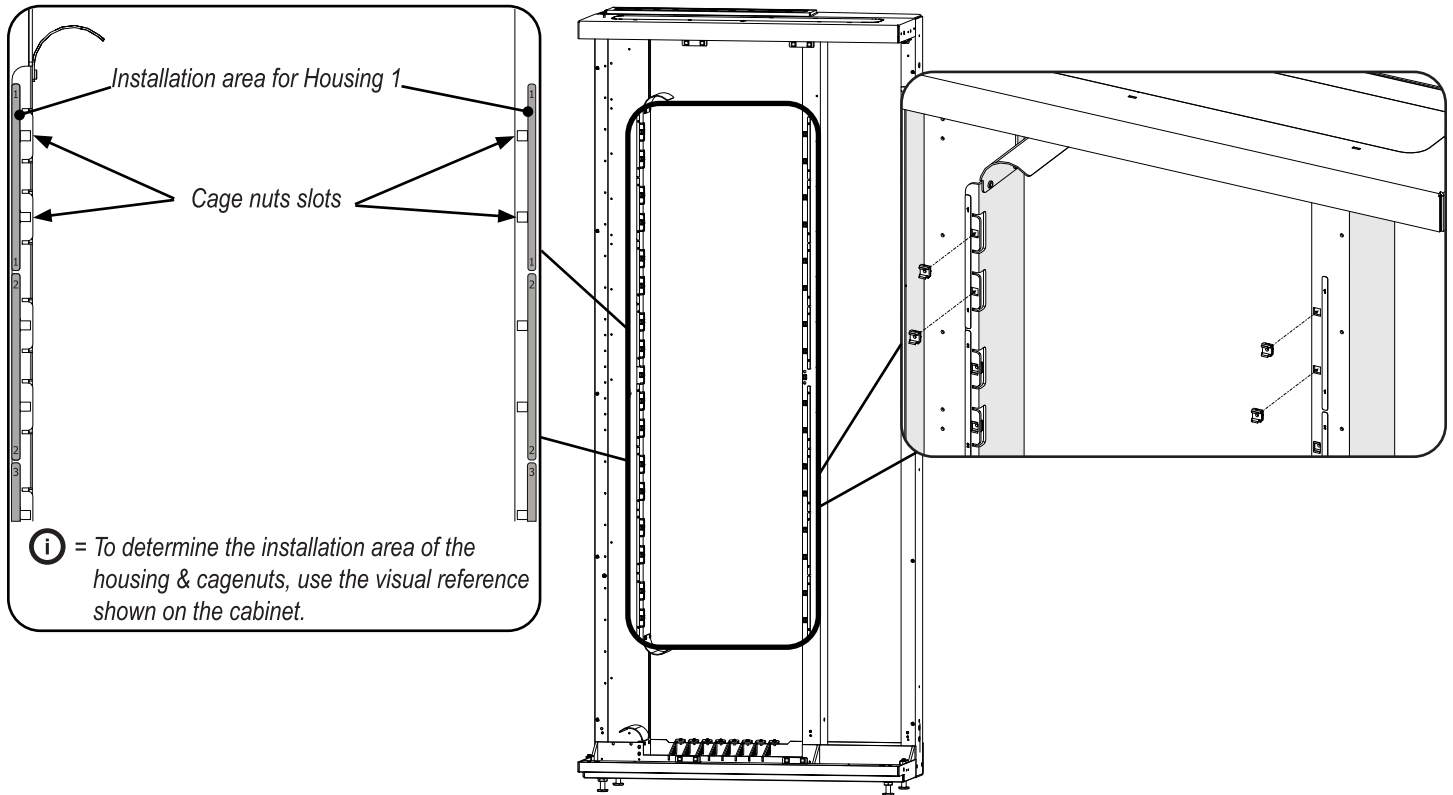

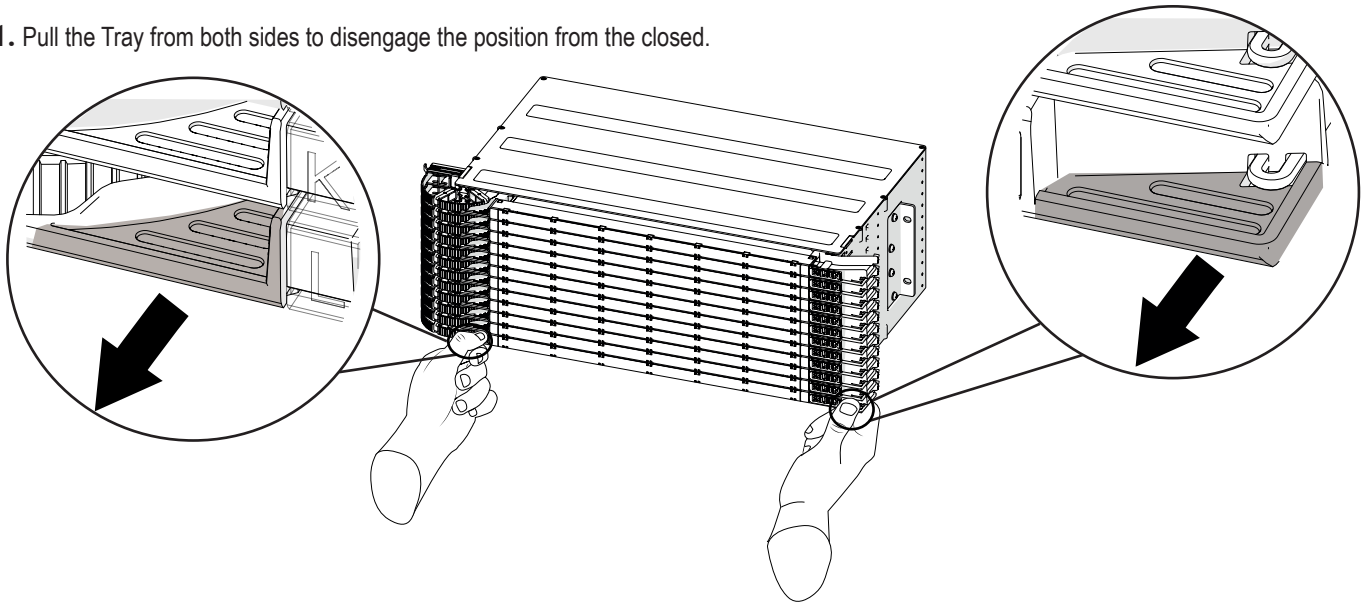

2. Once the installation area is determined, align the Housing brackets to the installed cagenuts.
Use the provided screws to secure the bottom (or top) of the brackets.
Repeat the previous procedure to secure the remaining sides of the brackets.

Top screws installed
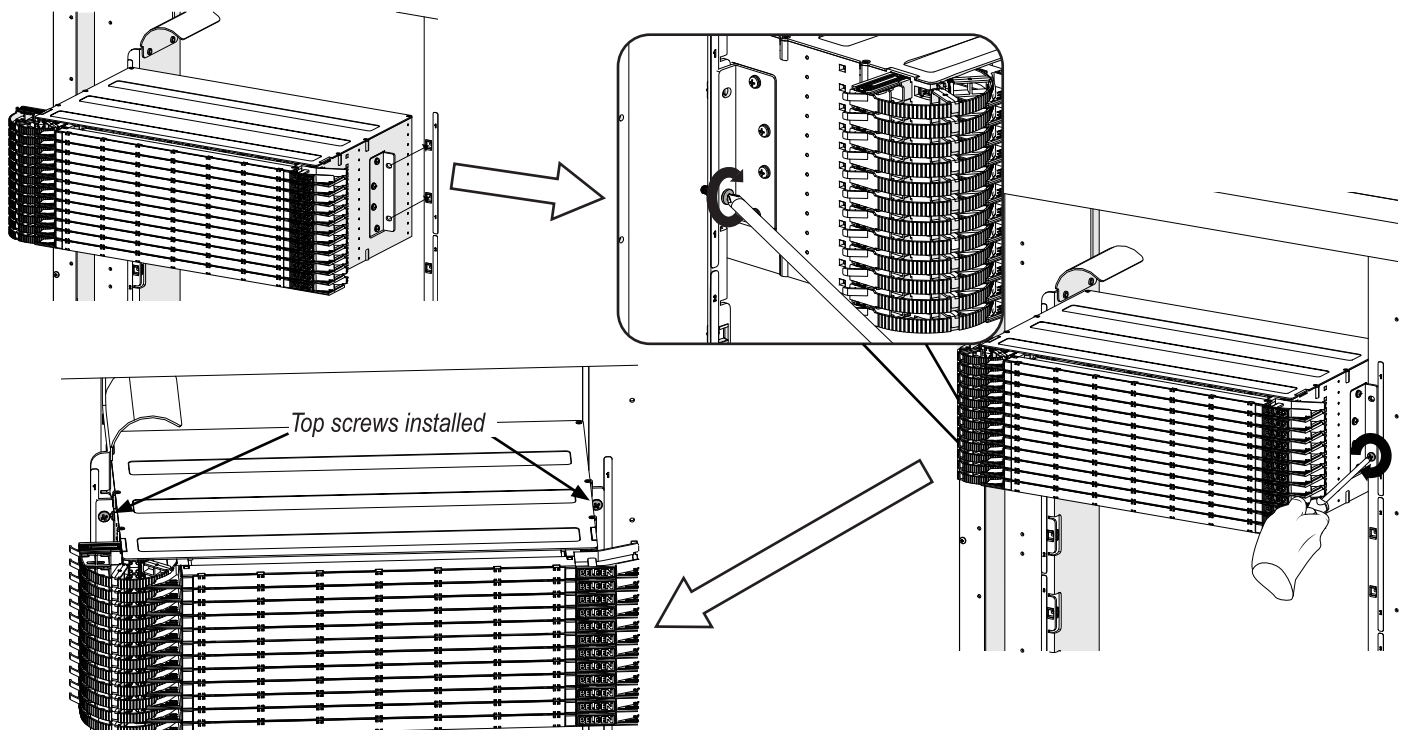

Tray openning

1. Pull the Tray from both sides to disengage the position from the closed.

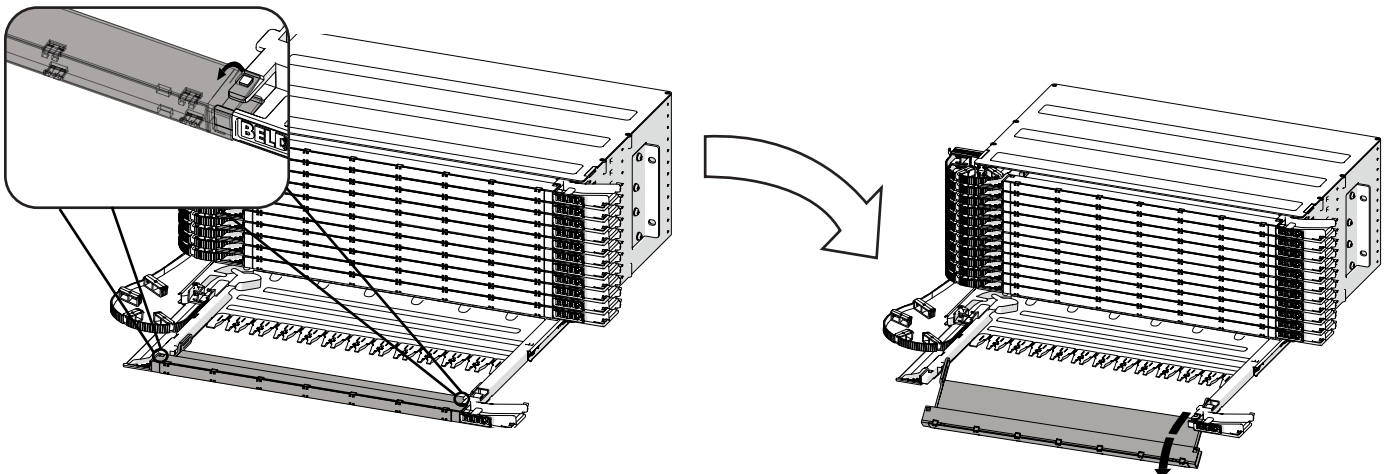

**2.** To open the Tray completely, squeeze the front latch and pull both sides of the tray.

Cassettes/Adapter Frames installation

1 Release the Patch Cover by lifting both sides of the cover and pull it outwards.
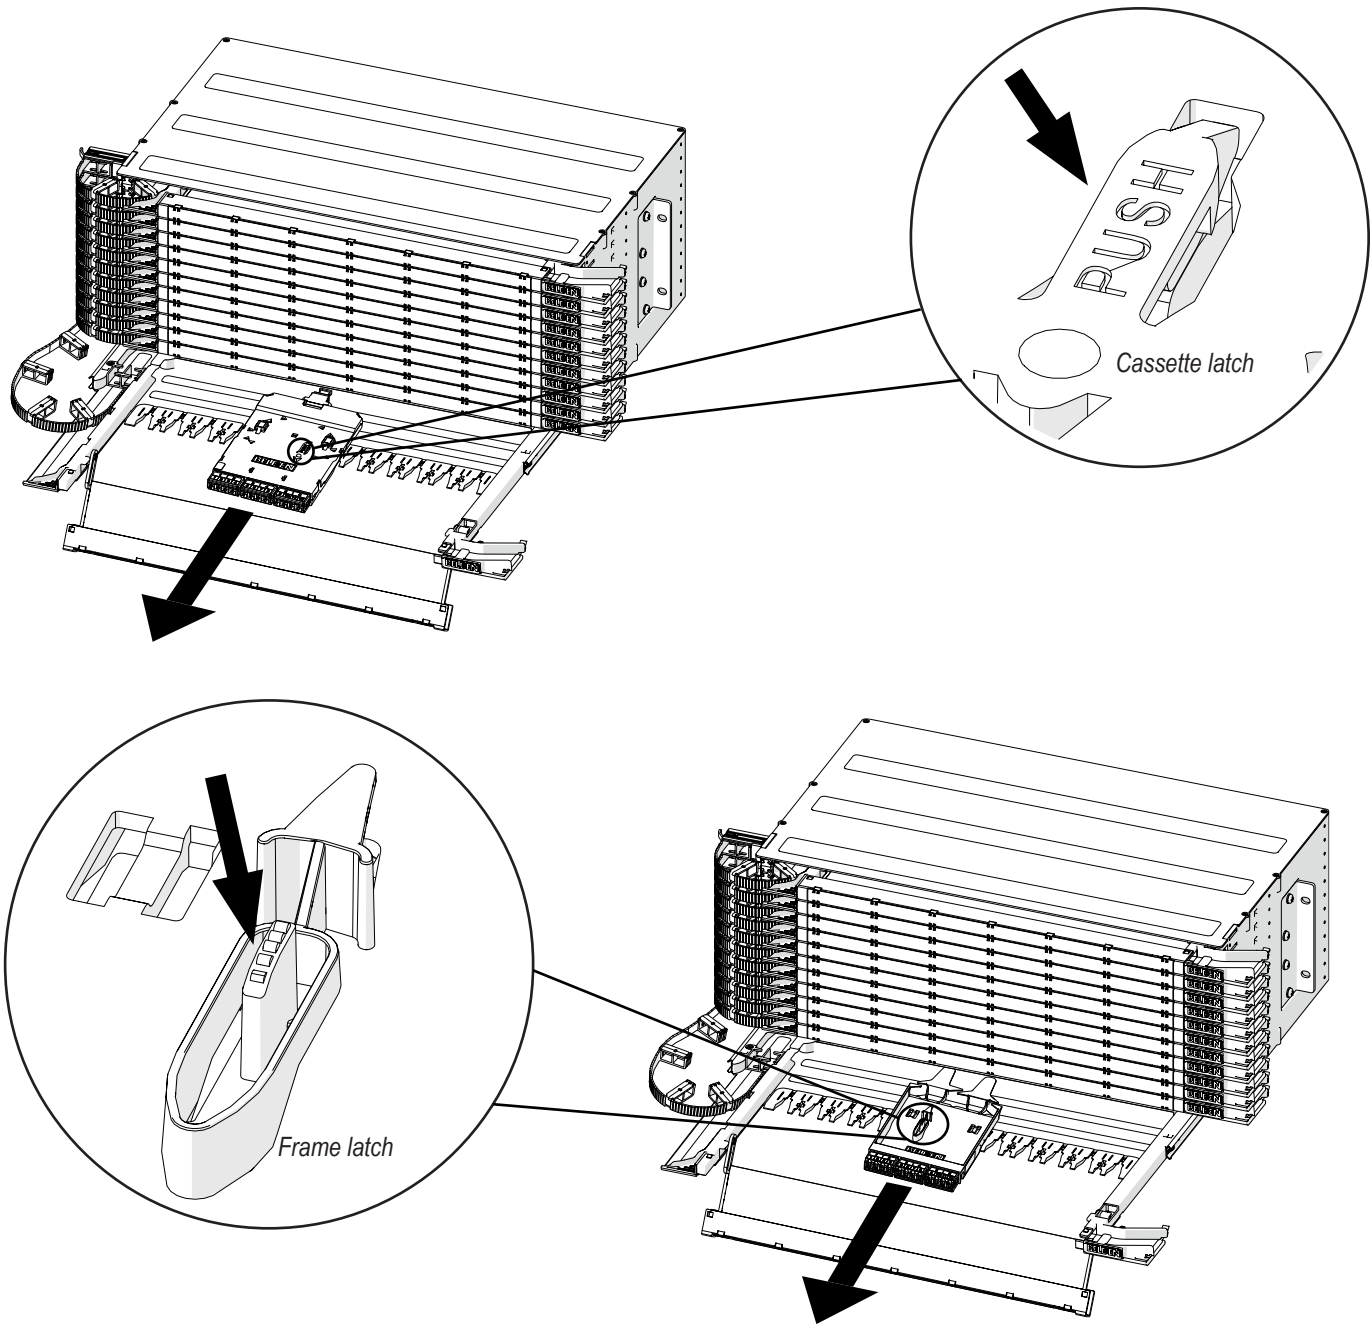

(i) = *The installation procedures shown are similar for DCX Adapter Frames & Splice Cassettes.*

2. Align the Cassette brackets to the tray attaching ports.
Make a slight push to attach the Cassette to the Tray.

■ = *Attaching ports*
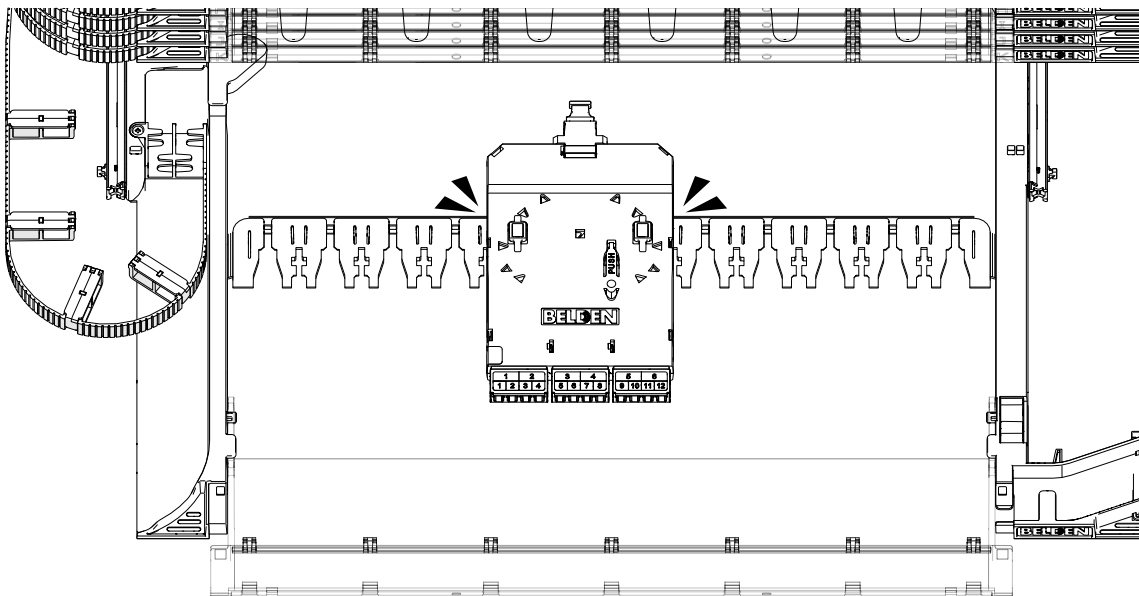

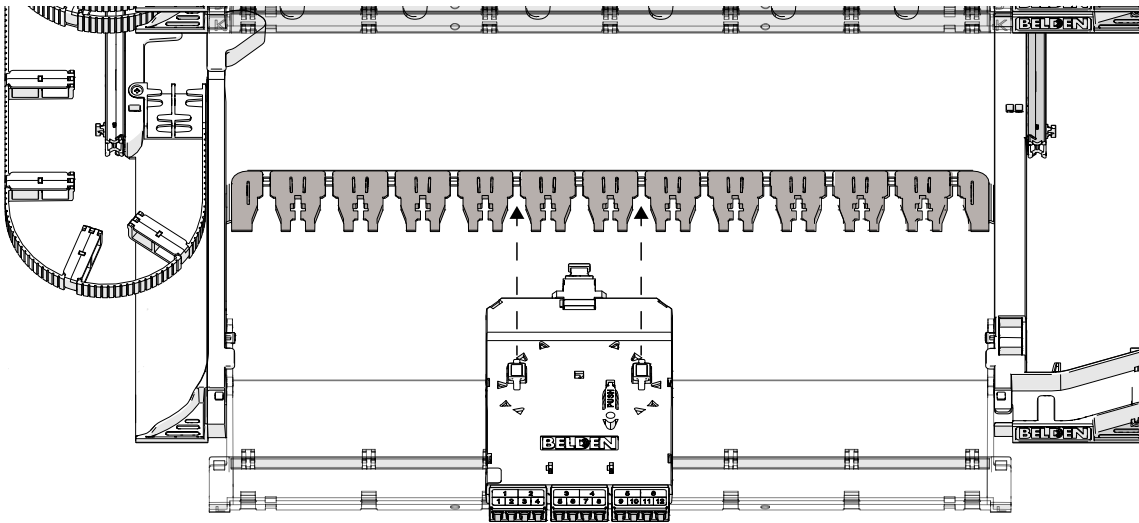

3. To remove the Cassette/Adapter Frame from the Tray, press on the latch and slide the component outward.
